

KRD Consulting Group

Full Stack Web Development Associate

Summary

KRD Consulting Group is looking for a post-secondary student for a Web Development position, to provide support to our existing clients and participate in a major refactoring project. Your main responsibilities will be to develop, maintain and support front-end and back-end components of sites running on Drupal and CiviCRM, as well as our in-house developed PHP database, ABCD.

Our ideal candidate is a life-long learner who is comfortable in the context of a very small team. There is a lot of ambiguity and a lot of opportunity to learn and to contribute skills and ideas. If you're keen on using your coding skills in a social-good business, we want to meet you!

Responsibilities

- Drupal/CiviCRM support:
 - Perform theme and module maintenance for a portfolio of Drupal/CiviCRM sites
 - Assist in the development and integration of new site features
- ABCD Refactoring:
 - Learn and map the MVC functionality of existing codebase
 - Assist in the migration of codebase from Zend/jQuery to Laravel/Vue.js
- Other related responsibilities as necessary

Skills & Background

- Strong grasp of modern web development approaches (MVC framework)
- Understanding of CMS/CRM systems (Drupal and CiviCRM preferable)
- Understanding of LAMP stack
- Experience with Laravel/Vue.js is a big plus!

Schedule and Wage

This is a summer-student position partially sponsored by the Alberta STEP program. The full-time position starts June 15, 2018. The starting wage range is from \$19/hour to \$24/hour depending on experience.

To apply, please forward your resume and a cover letter to Roman Katsnelson at roman@hellokrd.net.
